Work experience

UX designer
Tweakers.net
Amsterdam

Leading the UX efforts of the Netherlands' biggest online IT-centric community. Responsible for user research, solution concepting and validation within the overall product design effort. Regularly part of inter-disciplinary teams including experts in data science, copywriting, marketing and community management.

0 years 2019 - today

Product designer
Qelp
Amsterdam

Led the redesign of the proprietary content management system of the company. Shipped applications on the websites of Sony Playstation, KPN & T-Mobile that help millions of end-users get online support for their device troubles. Implemented a UX-centric design process into the agile development cycle. Introduced a structured innovation pipeline for company-wide intrapreneurship. Organized bi-weekly design sprints and facilitated workshops on UX-centric design thinking.
